

Bali Environment Foundation: Scoping Report Contents Overview

[Conservation Collective](#) (CC) is a global network of 20 local environmental foundations dedicated to protecting the environment, restoring nature, and combating climate change. As a UK-based charity, CC incubates, launches, and supports locally focused foundations, unlocking new funding channels for impactful grassroots environmental projects.

CC is expanding its network by establishing the Bali Environment Foundation (BEF), aimed at preserving and enhancing the natural beauty, biodiversity, and ecosystems of Bali. BEF will act as a funding body, channeling resources from private donors, corporations, trusts, and foundations to support grassroots conservation initiatives in Bali.

Conservation Collective and a group of funders with strong connection to Bali are **looking for a consultant to conduct a comprehensive scoping report to understand the conservation needs and the civil society landscape in Bali, to form the basis of a grant giving strategy.** The model's value add is to create a neutral platform to build alliances with local stakeholders, foster cross-sector collaborations and turbo-charge the impact of local communities working to protect and restore nature at the grassroots.

The scoping report should be composed of three main elements:

1. **Overview of the environmental landscape of Bali:** what are the key challenges, priorities and opportunities?
2. **Positioning Piece:** Conducting interviews with environmental NGOs as well as grassroots organisations active in the area, documenting key needs, opportunities, and challenges.
3. **Feasibility Study:** with Conservation Collective, identifying donors with connections to or interest in Bali. Determine current funding sources of key conservation projects on the islands.

Consultant Requirements:

- Local resident or well-integrated in the area with excellent communication and writing skills.
- Proactive, highly organised self-starter with an entrepreneurial approach.
- Strong connections with government, policymakers, and businesses.
- In-depth understanding of/experience working with key NGOs operating in the region.
- Background in environmental studies.

Suggested Scoping Report Contents:

- **Introduction:**

- Fundraising strategy.
- **References:**
 - Citations for research and sources.

Scoping studies typically take between 1-2 months, and their length depends on the number of citations and photographs. Typically, they are around 20-30 pages, condensed into 9-10 pages of an executive summary.

The consultant will be compensated a total of \$1,000 USD for the completion of this study. Payment will be disbursed in two instalments:

First installment: \$500 USD upon completion and submission of the first draft

Final installment: \$500 USD upon submission of the final version following feedback and revisions based on comments from founding donors.

Please note that successful scoping studies can lead to being considered for the role of the Executive Director of the new organisation.

To Apply: Please send your CV and a short cover letter to sekoah@conservation-collective.org
